

## THE GREEN CHOICE FOR BUTT DISPOSAL

Maxibin is committed to creating an environmentally sustainable solution to cigarette butt litter and providing a hygienic alternative to unattractive and bad-smelling disposal systems frequently used in public areas.

**Maxibin provides an easy to use product and service with minimal impact on the environment during the cleaning and incineration processes.**

Lit cigarettes are dropped into the Stompie Bin and are extinguished inside the fire retardant fibreglass container. The bins are cleaned with a multi-purpose anti-bacterial solution called 'BacPhen' which disinfects and prevents foul odours.

## LEASE & SERVICING

Bins can be leased for a monthly service charge. Leased bins are emptied at regular intervals. The contents are disposed of by incineration with the smoke being 'scrubbed' to ensure the process is environmentally friendly.

# maxibin

## NO BUTTS ABOUT IT

## FEATURES & BENEFITS

- ⌘ Safe disposal of cigarette waste
- ⌘ Can be used to indicate designated smoking area
- ⌘ Solid & heavy structure (challenging to vandals)
- ⌘ Can be customised to blend with surroundings
- ⌘ Weather proof - can be positioned in open areas
- ⌘ Environmentally sustainable & hygienic
- ⌘ Does not attract disposal of other rubbish
- ⌘ Low maintenance / hard wearing
- ⌘ Portable & freestanding
- ⌘ Various branding opportunities

## SPECIFICATIONS

Size 750mm x 350mm x 120mm

Weight - 95kg

## MATERIALS

**Body:** Concrete

**Container:** Fire Retardant Fibreglass

**Choice of 3 External Finishes:** Rheeboek Exposed Aggregate / Sandstone Exposed Aggregate / Epoxy Paint
